

Infection prevention starts with **every** action

Tips for Infection Prevention and Control Practitioners

Embed leadership support
and governance

Maintain, review and
publicise core IPC
policies and
procedures

Ensure robust
environmental cleaning,
decontamination, and
equipment reprocessing

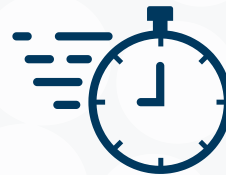

Strengthen surveillance,
data analysis, and
feedback loops

Foster education, training,
and competency among
all staff

Engage patients,
families, and visitors in
infection prevention

Plan for outbreak
readiness and
rapid response

Promote antimicrobial
stewardship and reduce
opportunities for
resistance

Use implementation
science and behaviour
change approaches

Measure and report
impact, celebrate
successes

Stay current, network,
and contribute to
evidence

Collaborate and
work with others.
