

Infection prevention starts with **every** action

Tips for health and social care staff

Clean your hands

Speak up and be
informed

Follow respiratory
hygiene / cough
etiquette

Ensure equipment,
devices, and
environment are clean
and safe

Use antibiotics responsibly, and
remember antibiotics do not
treat viruses, including Flu

Get vaccinated as
appropriate

Stop and remove
unnecessary
invasive devices

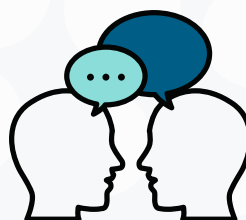

Respect personal and
environmental
hygiene

Stay alert to signs of
infection and report early
and instigate prompt IPC
precautions

Stop unnecessary
glove use

Engage in shared
decision-making
and transparency

Support continuous
improvement and
learning
